

# OP 49

## TOP FEATURES

- Combines high yield and tensile strength after PWHT and good toughness at low temperature with mild steel wires
- Highly basic flux with silicon and manganese pick-up
- Offers good toughness in two-run and multirun with S2Mo wire grade

### TEST RESULTS

Test results for mechanical properties, deposit or electrode composition and diffusible hydrogen levels were obtained from a weld produced and tested according to prescribed standards, and should not be assumed to be the expected results in a particular application or weldment. Actual results will vary depending on many factors, including, but not limited to, weld procedure, plate chemistry and temperature, weldment design and fabrication methods. Users are cautioned to confirm by qualification testing, or other appropriate means, the suitability of any welding consumable and procedure before use in the intended application
